

## Sample Book Report on Harry Potter

The first time that the young wizard Harry Potter meets his end is when he was not even two years old. This scene appears at the beginning of the book, after which the rest of the story takes off. The next five books in order center around his life as a student of Hogwarts School for Witchcraft and Wizardry, where he has many exciting adventures with amazing creatures like house elves, centaurs, goblins, hippogriffs, etc., some dangerous foes like an evil sorcerer named Lord Voldemort (who killed his parents), and new friends like Ron Weasley and Hermione Granger.

It is extremely interesting to follow how Harry grows up with these fantastic experiences occurring regularly in his life, dealing with all the challenges they bring him every year at school. In the final book, Harry's sixth year at Hogwarts, he must face Voldemort once and for all. His friends Ron and Hermione are always by his side during these battles.

A lot of people believe that Harry Potter is a story about love and friendship conquering evil, which I also think to be true since J.K Rowling spends a lot of time creating her characters to have many different personality traits that will shine in certain situations.

By the end of it all, whether you read this book as a child or an adult--or both!--you learn what makes a person "good" or "bad".. Reading this is a great example of how someone can not judge a book by its cover. This entire series is about many different cultures and creatures that we didn't know existed before or never took the time to learn about. It is a fantastic series and I would recommend it to anyone who hasn't read it yet!
